LANGUAGES AND TECHNOLOGIES

- *Programming Languages:* JavaScript, TypeScript, Python, HTML5, CSS3, PHP, C# .NET, Java
- *Databases:* SQL (MySQL, PostgreSQL), NoSQL (MongoDB)
- *Libraries and Frameworks:* Node.js, Express, React, Redux, Laravel, jQuery, Tailwind, Cypress
- *Tools:* Git, Figma, Jira, Trello, Adobe Photoshop, OAuth, REST APIs, WordPress CMS

EDUCATION

M.S. SOFTWARE ENGINEERING *Graduated December 2023*

Kennesaw State University

- Achieved 4.0 Graduate GPA; Awarded Dean's 4.0 GPA List
- Relevant courses: software architecture, requirements engineering, Agile methodologies, web services engineering, project planning and management, software testing, and object-oriented design patterns

B.S. INFORMATION TECHNOLOGY (Web and Mobile Systems) *Graduated July 2020*

Kennesaw State University

- Awarded President's List (4.0 GPA) in 2017
- Relevant courses: project management, databases, responsive / mobile web development, software security, and programming

EXPERIENCE

FREELANCE WEB DEVELOPER *February 2025 – Present*

- Currently developing 3 client websites across healthcare, education, and construction industries (in progress)
- Build and customize websites using modern WordPress, PHP, HTML5, and CSS3
- Develop custom contact forms and dynamic site functionality tailored to client needs
- Modify and extend the WordPress interface to create intuitive, user-friendly content management experiences for non-technical users
- Collaborate with clients to translate business requirements into functional, accessible web solutions
- Ensure responsive design and cross-browser compatibility across all projects

FULL-STACK SOFTWARE ENGINEER *August 2019 – Present*

The Entryway Surgeon

- Planned, designed, and developed a website with photo galleries, user feedback capabilities, and administration functions, using HTML5, CSS3, PHP 8, Laravel 12, and Tailwind CSS v4, improving audience reach by 100%
- Integrated Google My Business API via OAuth to display the company's Google reviews directly on the site, boosting user trust
- Engineered image processing programs with Python and C# to streamline content management processes by more than 100%
- Communicated with key stakeholders to plan and refine content changes and new feature requests
- Maintained the website to handle security and performance upgrades

FULL-STACK SOFTWARE ENGINEER *August 2023 – December 2023*

VillageHours

- Contributed with a team of 6 following Agile and Kanban methodologies to develop a full-stack web application allowing non-profit organizations to better manage their projects and resources
- Implemented project requirements using React, TypeScript, Chakra UI, React Query, Redux, Node.js, Express, and MySQL
- Performed unit, component, and E2E testing using Jest, React Testing Library, and Cypress E2E suites
- Implemented CI/CD pipelines using GitHub Actions and Docker to deploy the project to Microsoft Azure
- Trained and mentored junior members on relevant technologies and development processes
- Communicated with project stakeholders to refine requirements and present progress towards product goals

SKILLS

- Expertise in responsive and mobile web application design
- Proficient in all phases of the software development lifecycle
- Experience in Agile project management and leadership
- Flexible with changing stakeholder and project requirements
- Knowledgeable of object-oriented principles and design patterns
- Skilled with REST APIs, OAuth, microservice design and integration
- Knowledgeable in AI integration and prompt engineering
- Proficient in hardware and software troubleshooting and configuration
