LANGUAGES AND TECHNOLOGIES

- *Programming Languages:* HTML, CSS, JavaScript, Python, TypeScript, PHP, C# .NET, Java
- *Databases:* SQL (MySQL, MariaDB), NoSQL (MongoDB)
- *Libraries and Frameworks:* Node.js, React, Redux, Express, jQuery, Laravel
- *Tools:* Git, Adobe Photoshop, Docker, Amazon AWS, Figma, Jira, Trello, REST APIs

EDUCATION

M.S. SOFTWARE ENGINEERING

Graduated December 2023

Kennesaw State University

- Achieved 4.0 Graduate GPA; Awarded Dean's 4.0 GPA List.
- Excelled in courses on software architecture, requirements engineering, Agile methodologies, Web Services engineering, project planning and management, software testing, and object-oriented design patterns.
- Performed research in areas such as AI, software testing, software project management, and Agile methodologies.

B.S. INFORMATION TECHNOLOGY

Graduated July 2020

Kennesaw State University

- Concentration in Web and Mobile Systems.
- Awarded President's List (4.0 GPA) in 2017.
- Relevant coursework included Project Management, Database Systems, Responsive & Mobile Web Development, and Programming.
- Functioned as an informal tutor and peer mentor to help solidify course understanding for classmates.

EXPERIENCE

FULL-STACK SOFTWARE ENGINEER

August 2019 – February 2022

The Entryway Surgeon

- Planned, designed, and developed a website with photo galleries and user feedback capabilities, as well as administration functions, based on PHP and Laravel 9, boosting audience reach by 100%.
- Engineered image processing programs with Python and C# to streamline content management processes by 100%.
- Incorporated SEO across the website, boosting audience and engagement significantly.
- Maintained the website to handle upgrades, content changes, and feature requests.
- Established online presence for the company across platforms such as Google My Business, further boosting the company's online visibility and engagement metrics, tracked with Google Analytics.

FULL-STACK SOFTWARE ENGINEER

August 2023 – December 2023

VillageHours

- Contributed with a team of 6 following Agile and Kanban methodologies to develop a full-stack web application.
- Implemented project requirements using React, TypeScript, Chakra UI, React Query, Redux, Node.js, Express, and MySQL.
- Performed unit, component, and E2E testing using Jest, React Testing Library, and Cypress E2E suites.
- Implemented CI/CD pipelines using GitHub Actions and Docker to deploy to Microsoft Azure.
- Collaborated with team members using GitHub and Atlassian Trello to manage codebase and resolve merge conflicts.
- Trained and mentored junior members on relevant technologies and development processes.
- Communicated with project stakeholders to refine requirements and present project prototype progress.

SKILLS

- Expertise in responsive and mobile web application design
- Proficient in all phases of the software development lifecycle
- Experience in project management and leadership
- Quick learner and flexible to changing requirements
- Knowledgeable of object-oriented principles and design patterns
- Skilled with REST API and microservice design and integration
- Excellent technical communication skills
- Effective problem solver led by creativity & critical thinking
