TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, PHP, C#, Java

Frontend: React, Redux, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express, Laravel

DevOps & Cloud: Docker, GitHub Actions, CI/CD, CircleCI, Heroku

Databases: PostgreSQL, MySQL, MongoDB, Prisma ORM

Testing: Jest, Vitest, React Testing Library, Cypress, Supertest, Testcontainers (Unit, Integration, Component, E2E)

Tools: Git, Jira, Figma, REST APIs, OAuth, Zod

EDUCATION

M.S. Software Engineering | Kennesaw State University

Graduated December 2023

- Awarded Dean's 4.0 GPA List

B.S. Information Technology (Web and Mobile Systems) | Kennesaw State University

Graduated July 2020

- Awarded President's List (4.0 GPA)

EXPERIENCE

Freelance Web Developer

February 2025 – Present

- Developing 2 responsive client websites across healthcare and education fields using WordPress, PHP 8, HTML5, React, JavaScript, and CSS3
- Create secure custom contact forms and dynamic interactive site functionality tailored to client needs to improve user experience and drive engagement
- Modify and extend the WordPress interface to create intuitive, user-friendly content management experiences for non-technical users
- Collaborate with clients to translate business requirements into functional, accessible web solutions which achieve business objectives
- Consult with clients to plan deployment and maintenance strategies to optimize costs and process management efficiency

Full-stack Software Engineer | The Entryway Surgeons

January 2026 – March 2026

- Modernized a legacy Laravel platform for a rebranding operation by upgrading the application stack to Laravel 12, PHP 8, Tailwind CSS v4, and Alpine.js, improving maintainability, responsiveness, and frontend performance, boosting audience by 2000 impressions
- Integrated OAuth-based Google Business Profile synchronization services, automating customer review ingestion and management workflows
- Enhanced administrative tooling and content management workflows, reducing weekly operational overhead by several hours
- Improved SEO contributing to increased online visibility and generating more than 25 new customer leads in a competitive market
- Provided ongoing maintenance support and periodic updates, with additional rebranding development planned in future phases

Full-stack Software Engineer | The Entryway Surgeon

August 2019 – February 2022

- Designed and developed a full-stack responsive web platform using Laravel 8, PHP 7, JavaScript, jQuery, HTML5, and CSS3, gaining the company more than 2000 impressions
- Implemented multimedia gallery systems, custom administrative functionality, and customer feedback features, backed by relational database structures, to improve client engagement and content management capabilities
- Managed ongoing website maintenance, performance optimizations, feature enhancements, and platform upgrades
- Developed internal administration functionality to streamline business operations and improve content publishing efficiency
- Engineered Python and C# automation tools reducing image processing workflows from multi-day manual processes to under two hours

PROJECTS

Full-stack Software Engineer | Kitchen Companion

August 2023 – Present

- Engineering a personal recipe management platform with external REST API integration, planned social features, and AI integration in the form of chatbot and agentic recipe discovery and meal planning workflows
- Achieving functional requirements through React, Redux, RTK Query, Express, TypeScript, Zod, Prisma, MongoDB, PostgreSQL, Turborepo, Docker
- Designing MongoDB and relational (PostgreSQL) database schemas and entity modeling to represent the application entities, with indexing and connection pooling to improve performance and scalability
- Scaffolding comprehensive unit, component, containerized integration, and E2E testing suites to verify required functionality and minimize regressions
- Managing codebase version control using Git and GitHub, with planned pre-deployment testing pipelines with CI/CD via GitHub Actions
- Orchestrating user recipe image and content uploading and management via Amazon AWS S3

Full-stack Software Engineer | VillageHours (Master's Capstone)

August 2023 – December 2023

- Contributed with a team of 6 following Agile and Kanban methodologies to develop a full-stack web application allowing non-profit organizations to better manage their projects and resources
- Manifested project requirements using React, TypeScript, Chakra UI, React Query, Redux, Node.js, Express, and MySQL
- Performed unit, component, and E2E testing using Jest, React Testing Library, and Cypress E2E suites
- Implemented CI/CD pipelines using GitHub Actions and Docker to deploy the project to Microsoft Azure
- Trained and mentored junior members on relevant technologies and development processes
- Communicated with project stakeholders to refine requirements and present progress towards product goals

Technical Project Lead | Software Project Management System

January 2023 – May 2023

- Led a cross-functional remote team of 5 following Agile and Scrum principles to develop a full-stack web application built for software development teams to manage their tasks, staff, and resources
- Coordinated scheduling and facilitated remote meetings to design user interfaces using Marvel and establish project requirements and team member roles
- Implemented project requirements using React, JavaScript, Chakra UI, React Query, Node.js, Express, and MongoDB
- Integrated role-based access control and multi-tenancy to allow separate teams with distinct privilege requirements to use the application
- Communicated with project stakeholders to refine requirements and present progress towards product goals

SKILLS

- Expertise in responsive and mobile web application design
- Proficient in all phases of the software development lifecycle
- Skilled with REST APIs, OAuth, microservice design and integration
- Results-driven and constantly striving for process optimization
- Knowledgeable in AI use, evaluation, and prompt engineering
- Skilled in hardware and software troubleshooting and configuration
